Trojan Battery Adds New 12-AGM Battery to Deep-Cycle AGM Line

Santa Fe Springs, Calif., Sept. 11, 2012 – As part of its ongoing strategy to offer a wide range of deep-cycle AGM battery options, [Trojan Battery Co.](http://www.trojanbattery.com) has added a new 140AH [12-AGM battery](#) to its product family. As the world's leading manufacturer of deep-cycle batteries, the new 12-AGM is ideal for applications that require a maintenance-free battery solution.

Trojan's deep-cycle AGM (absorbed glass mat) batteries feature a number of design elements to provide optimum performance. Robust plates extend the lifecycle of Trojan's deep-cycle AGM batteries. A separator of glass fibers serves to isolate the positive and negative plates while acting as a blotter to absorb the electrolyte. The separator is maintained under compression between plates to assure contact with the plate surfaces resulting in reliable power generation. A computer-generated, low calcium grid design is optimized for high-power density, and allows for reduced gas emissions. In addition, the battery features a flame arresting, one-way press relief vent to prevent buildup of excessive pressure. Trojan's deep-cycle AGM batteries are low temperature tolerant, shock and vibration resistant, and have a low internal resistance for higher discharge current and high charging efficiency.

Trojan's deep-cycle batteries are available worldwide for a variety of battery-powered applications. To order please visit: <http://www.trojanbattery.com/About-Us/MasterDistributors.aspx>.

About Trojan Battery Company

Trojan Battery Company is the world's leading manufacturer of deep-cycle batteries, offering a complete portfolio of technologically-advanced deep-cycle flooded, AGM and gel batteries that provide maximum long-lasting performance to meet the requirements of today's advanced floor machine, golf/utility, renewable energy, AWP, recreation vehicle, marine and transportation applications. Trojan Battery Company, founded in 1925, is ISO 9001:2008 certified with U.S.-based operations in California and Georgia. For more information, visit www.trojanbattery.com.
