### Trojan Battery Adds Group 31 Size Battery to Solar AGM Line

**SANTA FE SPRINGS, Calif., June 19, 2018** – [Trojan Battery Co., LLC](#), the world’s leading manufacturer of deep-cycle batteries, today announced the addition of a Group 31 size battery to its [Solar line](#) of maintenance-free, true deep-cycle absorbed glass mat (AGM) batteries designed for solar and other renewable energy applications. The Trojan SAGM 12 105 is manufactured in the U.S. and is now available.

The Trojan SAGM 12 105, along with the entire Solar AGM line of batteries, will be showcased at [Intersolar Europe](#) this week in Munich at the Trojan Battery booth B1.460.

Offering a three-year warranty for stationary applications and tested to an eight-year design life under IEC 61427 standard for solar batteries, the SAGM 12 105 features a non-spillable design, enabling installers to customize the use and position of the batteries in customer applications. The Trojan AGM Solar line was designed for maximum sustained performance and increased total energy output to meet demanding deep-cycling requirements in Trojan’s wide range of stationary applications, including solar home, area and street lighting, microgrid, inverter backup and commercial.

“Trojan’s Solar AGM line is specifically engineered for deep-cycling applications, unlike most AGM batteries on the market today which are designed for dual-purpose or standby applications, such as Uninterruptible Power Supply, or UPS,” said Dawnmarie Martin, director of product management for Trojan Battery. “Trojan has focused on deep-cycle technology longer than any other battery manufacturer in the industry and has utilized our extensive expertise and knowledge in developing the industry’s most reliable deep-cycle AGM battery.”

### **About Trojan Battery Company**

Trojan Battery is the world's leading manufacturer of deep-cycle batteries and a battery technology pioneer, having built the first golf car battery in 1952. Trojan batteries provide power for a wide variety of applications that require deep-cycle battery performance, including aerial work platform, floor cleaning equipment, golf and utility vehicles, marine/RV, material handling, oil/gas, remote telecom and renewable energy.

Founded in 1925, the company is ISO 9001:2015 certified with operations in California and Georgia. The company also maintains two of the largest and most extensive research and development (R&D) centers in North America, as well as operates a third R&D facility in Sligo, Ireland at IT Sligo. These R&D centers are dedicated to engineering new and advanced battery technology. For more information on Trojan Battery visit [www.trojanbattery.com](http://www.trojanbattery.com).
