

Kalyan Jana

Senior Applications Engineer for Renewable Energy Group

Kalyan Jana is a senior applications engineer and supports Trojan Battery's renewable energy (RE) group. Jana brings more than 25 years of battery development and engineering experience to his position. His strong background in lead acid battery engineering and design strengthens the scope of Trojan's RE team.

Jana serves as Trojan's battery engineering expert on the RE team to address detailed battery technology topics and specific customer requirements. He will work closely with Trojan's RE group and customers to develop and conduct battery technical and application training at customer locations, trade shows and conferences, as well as via webinars. Jana also will support Trojan's RE sales team efforts on new customer outreach activities and new business presentations. In addition, he will assist the RE marketing team in developing technical briefs and related collateral materials.

Jana has held a variety of technical engineering positions in the battery industry with responsibilities ranging from application engineering, product development and management to new business development and technical support.

Jana earned his MBA from the University of Phoenix, and holds a bachelor of science degree in electrical engineering from the Birla Institute of Technology, Mesra located in Ranchi, Jharkhand, India.
